I first met Keith at one of the old McDonnell-Douglas Railroad Club shows. It was my first time and he inquired about my interests and we remained in contact ever since. He often had railroad photos to share and offered assistance when I began writing one of my railroad projects. One could always count on Keith. My sympathies to all his family.

Nobody was better at developing 3D models and lofted surfaces in our CAD/CAM systems. He was our 'go to' man when something extremely complex came up. He was honest, dependable and straight-forward so you'd better be prepared for his answer when you asked him a question. You are missed my friend.
