“ *I was a MLT student of Larry's from the LCCC Class of 1978. Larry was a great instructor and I learned many valuable laboratory lessons from him. He was rough around the edges but kind and caring underneath. He truly wanted to see all in his class succeed. I send my deepest sympathy and many prayers to all his family. May God surround his family with His love and comfort. With sympathy,
Rhonda (Likes) Scott*

“ Larry was always willing to share his professional information and his interest in science. I first heard him on Steve Potter's morning show on WBGZ, 1570 AM and 94.3 FM when he shared interesting and often quirky facts. Steve Potter eventually left the station and I was more than happy to have Larry, aka Mr. Science, as a regular guest on my afternoon program for many years.

Many times in doctors' offices or at blood donations, I would ask those drawing blood if they had studied at Lewis and Clark Community College and if they'd had Larry for an instructor. If the answer was yes, they'd smile and add they thought he was a great instructor. A nice legacy.
